DETAILED ACTION

Allowable Subject Matter

1. **Renumbered claims 1-5** are allowed (e.g., **original claims 19-23**). **Original claims 1-18** have been canceled.

2. The following is an examiner's statement of reasons for allowance:

As per **original independent claims 19-23**, the cited prior art, either singly or in combination, fails to anticipate or render obvious an interactive visual modeling tool which allows visual operation of a multi-level decision tree and decision levels, wherein the user has the option of browsing through multiple decision levels respective of problematic considerations, questions and answers, by allowing the user to selectively step through decision branches of the model.

Dillon et al., "Risk of Extreme Events via Multi-Objective Decision Trees: Application to Telecommunications", and Finkel, U.S. Patent No. 6,091,893, teaches of using decision trees to model problems and building architectural decision models, respectively. However, the cited art fails to explicitly focus on the aforementioned method of allowing the user to selectively navigate through branches of a multi-level decision model, respective of situational aspects.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
